♦ Taguig City, Philippines · Remote worldwide

01 PROFILE

Automation architect who turns manual operations into **self-running, agentic AI systems**. Ten-plus years across GoHighLevel, marketing automation, and product engineering, now designing **multi-agent orchestration** that coordinates Claude, the Hermes autonomous ops agent, and OpenClaw computer-use automation through custom **MCP servers** and n8n. I build the full stack too, from React + Supabase SaaS to the infrastructure it runs on, local, cloud, or VPS, then hand off systems that monitor and correct themselves.

02 EXPERIENCE

Operations Manager & Automation Architect CURRENT

2024 to Present

Zaptify · Remote (Global)

- Run day-to-day operations while architecting the agentic layer that automates them, coordinating Claude, the **Hermes** autonomous agent, and **OpenClaw** computer-use automation into one orchestrator.
- Built an always-on ops and SEO-fulfillment watchdog that flags and resolves issues without human polling, cutting manual oversight sharply.
- Deployed a custom **n8n-MCP server on DigitalOcean** so AI assistants (ClickUp Brain) build and run n8n workflows directly through natural language.
- Ship full-stack internal tools and client SaaS on React + Supabase with row-level security, auth, and multi-tenant data models.

Agentic Orchestration Claude Hermes OpenClaw MCP n8n DigitalOcean
Supabase

Founder & GHL Marketplace Developer FOUNDER 2024 to Present

HighLevel Apex · Remote / Philippines

- Founded a private GoHighLevel community and app studio serving GHL agencies and power users.
- Building **Levelizer**, a marketplace intelligence app that scans, guards, and auto-fixes sub-account health across an agency's locations.
- Ship marketplace-ready tooling with OAuth, sub-account context, and a dark command-center UI.

MARKETING & GROWTH

Facebook Ads Google Ads Media Buying
Funnels SEO / Analytics

CarDeck PH, Full-Stack Car Marketplace

FULL-STACK SAAS

End-to-end multi-tenant car marketplace for the Philippine market on React + Supabase. Dealer, buyer, and admin roles under one cohesive "Clear Ledger" design system, secured with row-level security.

- ✓ Dealer / buyer / admin roles
- ✓ RLS-secured multi-tenant data
- ✓ 5-phase design-system overhaul
- ✓ Live listing-to-inquiry loop

React Supabase TypeScript Tailwind RLS

Levelizer, GHL Marketplace Intelligence

MARKETPLACE APP

A GoHighLevel marketplace app that scans, guards, and auto-fixes the health of an agency's sub-accounts, surfacing misconfigurations and risks across every location from one dark command-center dashboard.

- ✓ Scan / Guard / Fix engine
- ✓ Agency-wide monitoring
- ✓ Automated remediation
- ✓ Command-center analytics

GHL API OAuth 2.0 React Supabase

n8n-MCP + AI Agent Infrastructure

AI & INFRASTRUCTURE

Deployed an n8n-MCP server on DigitalOcean App Platform so AI assistants like ClickUp Brain build n8n workflows through natural language, plus an always-on AI ops-watchdog agent.

- ✓ n8n-MCP live on DigitalOcean
- ✓ Natural-language workflows
- ✓ Always-on ops monitoring
- ✓ AI + infra orchestration

MCP n8n DigitalOcean AI Agents Node.js

Application Security & RLS Auditing

SECURITY ENGINEERING

Audited a production Supabase SaaS quote-engine, finding and fixing critical row-level-security and authentication vulnerabilities before they could expose customer data, then hardened the access model end to end.

- ✓ Critical RLS gaps fixed
- ✓ Auth hardened end-to-end
- ✓ Zero exposure post-fix
- ✓ Review process documented

Supabase Row-Level Security Auth PostgreSQL
